Profile

Hold on ONE second :)!

Now that you stopped here, maybe you also want to read a little further.

As a former finance professional with a passion for coding and technology, I am excited to make a career change and pursue my dream of becoming a Front-end Developer. While my background in finance provided me with valuable analytical and problem-solving skills, I found myself drawn to the creative and technical aspects of web development. Through rigorous self-study and hands-on projects, I have gained proficiency in HTML, CSS, and JavaScript, and am eager to continue learning and growing as a developer. I am excited to bring my diverse background and fresh perspective to the field of technology, and am confident that my determination and enthusiasm will make me a valuable asset to any team.
